

Music

Music at Egå is mainly rhythmical ensemble classes.

We have a well-equipped music room and a little extra room for practicing. Some students bring their own instruments. Classes are organised so both beginners, somewhat advanced and advanced students can participate. They can also be described through certain genres or intentions.

We enjoy many visits from bands from Århus and other schools, so we have a prospering music environment.

Classes can be described like this:

Rhythmic ensemble

Focusing on selected tracks we will make the music swing. Singers and wind instruments are very welcome. Apart from that, we need guitar, bass, drums, keyboard and percussion. We finish off with a little concert for the other students.

or

Band

A band class for those of you who have tried playing / singing before. Reggae / soul / funk / rock could be genres we will experiment with. There will be time to interpret the songs of others, compose your own material and jamming away. Music is a strong way to express yourself and anything can happen. Personal expression, communication and playing together. All instruments and voices are welcome.

Music for experienced students

Ensemble playing for students with some experience with their instrument.

The class can also be

Ensemble playing for beginners

A class where you can try playing the keyboard, drums or bass. You can sing your first rock song. If you wish to play the guitar, you must know some words in advance.

Examples of music classes described through its contents:

Music

From Blues to Art rock

Through examples from 50 years of publishing, you will get an idea of how rock music has developed from three-chords blues to The Beatles breaking this tradition and developing highly sophisticated music. You will get a chance to present your own music.

Music

There's a world full of possibilities and ways to write and compose music and lyrics. Together, we will discover our own expressions and find the inspiration to make music. We will also listen to other ways of doing it. How this class is going to work is quite open, for example individually or in groups. Feel free to bring along plenty of ideas, but it's not a must.

Choir

Release your joy:

Energy – charisma – dynamics – sound – power – love.

Be part of the great gospel choir. We will try out very funky contemporary gospel music, but we will also sing songs that aren't directly gospel. Loads of opportunities to go solo, rap, dance and go nuts.

Musical

We will create a musical and perform in front of a big audience. We have not yet decided on the musical production, but we will work with all the elements of a musical: acting, singing, dancing, band, costumes, props and technique.

It's hard work putting on a musical, especially when we're closing in on opening night. Our goal is an amazing performance with a swinging band.

Learn an instrument

We offer instrumental classes when needed and when we have the time. Singing, piano and guitar lessons.
