

Theatre

We create lots of theatre at Egå. To test ourselves, know the theatre and create great performances. Århus is a great theatre city, and we are offered many performances.

We have a theatre hall, well equipped with lights and sound systems, and we often cooperate with for instance the music classes.

Here are some examples of class descriptions:

Theatre

This class is an all-round theatre class. It involves analytical theatre work, and we will work practically with creating characters, body awareness and focus training – all the elements in an actor's job. Do you think it's funny to experiment with different roles and quirky sides of your personality? Then this class is the arena to let these feelings out.

During the class we will visit a theatre as well as analysing performances and different ways of making theatre.

Acting class

If you want to test your acting dream, this class is for you. We work with basic acting techniques, and you will learn how some of the masters work with acting tools, for example Stanislavski, Michael Chekhov and Jens Arentzen. It's about outer and inner ways of creating a character, storytelling, the body and stage presence. Everybody will work on a monologue, and the class will focus on your individual needs. We aim to create a performance in front of an audience.

Theatre Sports

A slapstick kind of class focused on fun.

You need no special skills to participate except a will to be present in the moment with a smile on the lips. Improvisation, fast lines, punch lines and quirky characters are on the programme from the get-go. Sign up if you fancy a good laugh.

Comedia dell'arte

Focusing on improvisation, character development and mask production, we will create a Comedia Dell'Arte performance. This originates from Italy, where theatre troupes travelled from town to town to entertain and turn people's lives upside down. You will learn how to perform with masks and be introduced to the main characters of Comedia Dell'Arte: Harlequin the fool, Pantalone the merchant, the wise Dottore, the young lovers etc. We finish off with a performance in front of an audience.

Black Theatre

Black theatre is theatre performed in ultraviolet rays, which means that light reflections make some things visible and other things invisible. We will create surprising and magical universes and make performers and props float in the air. Performers are often invisible - so this class is also ideal for students with stage fright. Your imagination and joint ideas are our starting point. We will get ideas, paint UV effects, try out effects and end up with a performance.

Musical

We will create a musical and perform in front of a big audience. We will decide on a musical production, but we will work with all the elements of a musical: acting, singing, dancing, band, costumes, props and technique. It's hard work putting on a musical, especially when we're closing in on opening night. The goal is a great new performance.

Musical Academy Line

This is a class for musical enthusiasts. You will be trained in all the elements of a musical: acting, singing and dancing. The class is also about the history of musical, and we will go to a performance. We end up with a small musical or a demonstration of our work.

Sparkle

A class of self-understanding to help you love who you are right now. We will cross boundaries and discover how problems become smaller.

Dream travelling / massage / personal challenges/ mind games etc.

Dancing

The autumn dance class is a palette of different styles. We will work with set choreographies, improvisations and our own ideas. Salsa, mambo, hip-hop, funk and show dance are some of the key words when the stereo's switched on.
